

# PRODUCT DATA SHEET

## FLAMORT CP Class 'A' Fire Retardant for Fabric (For Interior Use Only)

### Description:

**Flamort CP** is a clear, non-toxic, fire retardant coating for textiles made of synthetic fibers such as polyester, cotton-polyester blends, acetates, and acrylics. Flamort CP is water-based and easy to apply by spray or dip methods. It is a California State Registered Fire Retardant (**Reg. #C-00415**), used by CA. State Registered Applicators, contractors, and businesses. This product does not contain any PDBE's, or formaldehyde.

### Fire Standards:

Flamort CP has passed the NFPA 701 Vertical Burn Test, CA. State Title 19 Health and Safety Code, FAA Section 25.853(b), and the ASTM-E84 Flame Spread Test Class 'A' Flame Spread Rating

**Flame Spread-0 Smoke Development-5**

Tested by QAI Laboratories

### Application:

On a clean, dry, surface (uncoated), apply by spray or dip method, until fabric is saturated.

Average rate of application is approx. 200 sq. ft. per gallon, depending on the thickness of the material. **Always pre-test a sample to ensure desired results.**

Dye changes and/or shrinkage may occur. Wash hands, and clean equipment with soap and water.

Washing will remove the fire retardant, however, fabrics may withstand 2-3 dry cleanings without re-treatment. Under ideal conditions, and proper application, the fire retardant treatment will last a minimum 7 years.

### Caution:

**Keep Out of Reach of Children and Pets.** Avoid prolong contact with skin (rubber gloves recommended).

Provide adequate ventilation when spraying. In case of contact with eyes, flush with water.

Wash hands after handling. **Complete Safety Data Sheet (SDS) available upon request.**

### Warranty:

We guarantee the standard quality of this material and its adherence to our specifications.

We expressly disclaim responsibility for its use, it being the responsibility of the buyer to determine whether or not the material is fit or suitable for treatment.
